

## SUMMER 2019 JOB OPENING

### VHDL Developer

---

Xiphera Oy is looking for a VHDL developer to join our team in Otakaari 5, 02150 Espoo, Finland. Xiphera is a start-up company founded in 2017 focusing on developing hardware-based security and cryptography solutions. Our technology is based mainly on FPGA (Field Programmable Gate Array) devices.

#### We offer

- Opportunity to work in an exciting security start-up
- A summer position with a possible future extension
- Flexible working hours and informal atmosphere

#### Your tasks include

- VHDL testbench development
- VHDL coding guidelines establishment
- Reviewing existing VHDL source code
- Writing new VHDL entities

#### Required experience

- Knowledge of VHDL
- Studies on electronics and computer engineering, computer science or related fields
- Written and spoken communication skills in English
- Natural curiosity and eagerness to learn new skills

#### Additional experience useful in the position

- HW/SW codesign
- Linux
- FPGA development experience with Intel and/or Xilinx FPGAs
- C / C++, Python
